The proceeds of this Tier II issue will be used by the Company for its regular business activities.

### 7.3 REQUIREMENT OF ENHANCEMENT OF CAPITAL

## **9. RISK FACTORS**

### **PROSPECTIVE INVESTORS ARE ADVISED TO CAREFULLY READ THESE KEY RISKS ASSOCIATED WITH THE SUBORDINATE BONDS**

#### **9.1 General**

The Subordinate Bonds are sophisticated instruments which involve a significant degree of risk and are intended for sale only to those investors capable of understanding the risks involved in such instruments. Do note that both the return on the Subordinate Bonds and the return of the principal amount in full are at risk if the Subordinate Bonds are not held till or for any reason have to be sold or redeemed before the Redemption Date. The Subordinate Bonds are a principal protected product only upon maturity.

The Subordinate Bonds are structured and are complex and an investment in such a structured product may involve a high risk of loss of a part of the initial investment as compared to investment in other securities unless held till redemption date. The investor shall receive at least the face value of the Subordinate Bond only if the investor holds and is able to hold the Subordinate Bonds till the redemption date. Prior to investing in the Subordinate Bonds, a prospective investor should ensure that such prospective investor understands the nature of all the risks associated with the investment in order to determine whether the investment is suitable for such prospective investor in light of such prospective investor's experience, objectives, financial position and other relevant circumstances. Prospective investors should independently consult with their legal, regulatory, tax, financial and/or accounting advisors to the extent the prospective investor considers necessary in order to make their own investment decisions.

The Company believes that the following factors may affect its ability to fulfill its obligations in respect of the Subordinate Bonds. All of these factors are contingencies which may or may not occur and the Company is not in a position to express a view on the likelihood of any such contingency occurring. The Company believes that the factors described below represent the principal risks inherent in investing in the Subordinate Bonds, but the inability of the Company, as the case may be, to pay principal or other amounts on or in connection with any Subordinate Bonds may occur for other reasons and the Company does not represent that the statements below regarding the risks of holding any Subordinate Bonds are exhaustive. Potential investors should perform their own independent investigation of the financial condition and affairs of the Company, and their own appraisal of the creditworthiness of the Company. Potential investors should consult their own financial, legal, tax and other professional advisors as to the risks and investment considerations with respect to the Subordinate Bonds. Potential investors should thereafter reach their own views prior to making any investment decision.

#### **9.2 Credit Risk**

Prospective investors should be aware that receipt of any coupon payment and principal amount at maturity on the Subordinate Bonds is subject to the credit risk of the Issuer. Investors assume the risk that the Company will not be able to satisfy its obligations under the Subordinate Bonds. Any stated credit rating of the Company reflects the independent opinion of the rating agency as to the creditworthiness of the rated entity but is not a guarantee of credit quality of the Company. Any downgrading of the credit ratings of the Company or its parent or affiliates, by any rating agency could result in a reduction in the value of the Subordinate Bonds. In the event that bankruptcy proceedings or composition, scheme of arrangement or similar proceedings to avert bankruptcy are instituted by or against the Company, the payment of sums due

on the Subordinate Bonds may be substantially reduced, delayed or lost. The holding company or the other group companies of the Issuer are not entitled to and will not support the Issuer in case of any bankruptcy of the Issuer.

### **9.3 Purchases and sales by the Company and its affiliates may affect the Subordinate Bond Holders' return**

The Company and its affiliates may from time to time buy or sell the Subordinate Bonds or debt instruments similar to the Subordinate Bonds and/or other obligations or have positions in securities economically related to a series of Subordinate Bonds for their own account for business reasons or in connection with hedging of the obligations under the particular series of Subordinate Bonds. These transactions could affect the price of such obligations or securities in a manner that would be adverse to the holder's investment in the Subordinate Bonds. The Company and its affiliates have not considered, and are not required to consider, the interests of investors as holders of the Subordinate Bonds in connection with entering into any of the above mentioned transactions.

### **9.4 The secondary market for the Subordinate Bonds may be non-existent or the Subordinate Bonds may be illiquid.**

The Subordinate Bonds may be very illiquid and no secondary market may develop in respect thereof. Even if there is a secondary market for the Subordinate Bonds, it is not likely to provide significant liquidity. An illiquid market may have an adverse impact on the price at which the Subordinate Bonds may be sold in the secondary market. Any such Subordinate Bond so purchased may be required to be held or resold or surrendered for cancellation. To the extent that an issue of Subordinate Bonds becomes illiquid, an Investor may have to hold the Subordinate Bond until redemption to realize value.

### **9.5 Tax Considerations and Legal Considerations**

Special tax considerations and legal considerations may apply to certain types of potential investors. Potential investors are urged to consult with their own financial, legal, tax and other professional advisors to determine any financial, legal, tax and other implications of this investment.

### **9.6 Accounting Considerations**

Special accounting considerations may apply to certain types of taxpayers. Potential investors are urged to consult with their own accounting advisors to determine implications of this investment.

### **9.7 Our business requires substantial capital, and any disruption in funding sources would have a material adverse effect on our liquidity and financial condition.**

As a finance company, our liquidity and ongoing profitability are, in large part, dependent upon our timely access to, and the costs associated with, raising capital. Our funding requirements historically have been met from a combination of term loans from banks and financial institutions, issuance of redeemable nonconvertible Subordinate Bonds, public deposits, the issue of subordinated bonds and commercial paper. Thus, our business depends and will continue to depend on our ability to access diversified funding sources. Our ability to raise funds on acceptable terms and at competitive rates continues to depend on various factors including our credit ratings, the regulatory environment and policy initiatives in India,

developments in the international markets affecting the Indian economy, investors' and/or lenders' perception of demand for debt and equity securities of NBFCs, and our current and future results of operations and financial condition.

Changes in economic and financial conditions or continuing lack of liquidity in the market could make it difficult for us to access funds at competitive rates. As an NBFC, we also face certain restrictions on our ability to raise money from international markets which may further constrain our ability to raise funds at attractive rates.

Such conditions may occur again in the future and may lead to a disruption in our primary funding sources at competitive costs and would have a material adverse effect on our liquidity and financial condition.

**9.8 High levels of customer defaults could adversely affect our business, financial condition and results of operations.**

Our business involves lending money and accordingly we are subject to customer default risks including default or delay in repayment of principal or interest on our loans. Customers may default on their obligations to us as a result of various factors including bankruptcy, lack of liquidity, lack of business and operational failure. If borrowers fail to repay loans in a timely manner or at all, our financial condition and results of operations will be adversely impacted.

**9.9 Our entire customer base comprises individual and/or small enterprise segment borrowers, who generally are more likely to be affected by declining economic conditions than larger corporate borrowers.**

Individual and small enterprise segment borrowers generally are less financially resilient than larger corporate borrowers, and, as a result, they can be more adversely affected by declining economic conditions. In addition, a significant majority of our customer base belongs to the low to medium income group and/or the small enterprises finance sector. Furthermore, unlike several developed economies, a nationwide credit bureau has only recently become operational in India, so there is less financial information available about individuals, particularly our focus customer segment from the low to medium income group who typically have limited access to other financing sources. It is therefore difficult to carry out precise credit risk analyses on our customers. Although we believe that our risk management controls are sufficient, we cannot be certain that they will continue to be sufficient or that additional risk management policies for individual borrowers will not be required. Failure to maintain sufficient credit assessment policies, particularly for individual borrowers, could adversely affect our credit portfolio which could have a material and adverse effect on our results of operations and financial condition.

**9.10 We face increasing competition in our business which may result in declining margins if we are unable to compete effectively.**

We face competition in all our lines of businesses. Our primary competitors are other NBFCs, public sector banks, private sector banks, co-operative banks and foreign banks and the unorganized financiers who principally operate in the local markets. Over the past few years, the retail financing area has seen the entry of banks, both nationalized as well as foreign. Banks have access to low cost funds which enables them to enjoy higher margins and / or offer finance at lower rates. NBFCs do not have access to large quantities of low cost deposits, a factor which can render them less competitive. In addition, interest rate deregulation and other liberalization measures affecting the retail and small enterprises finance sector,

together with increased demand for capital by individuals as well as small enterprises, have resulted in an increase in competition.

All of these factors have resulted in us facing increased competition from other lenders in each of our lines of businesses, including commercial banks and other NBFCs. Our ability to compete effectively will depend, to some extent, on our ability to raise low-cost funding in the future. Furthermore, as a result of increased competition in the finance sector, finance products are becoming increasingly standardized and variable interest rate and payment terms and lower processing fees are becoming increasingly common in the finance sector in India. There can be no assurance that we will be able to react effectively to these or other market developments or compete effectively with new and existing players in the increasingly competitive finance industry. Increasing competition may have an adverse effect on our net interest margin and other income, and, if we are unable to compete successfully, our market share may decline.

If we are unable to compete effectively with other participants in the finance sector, our business, future financial performance and the trading price of the Subordinated Bonds may be adversely affected.

**9.11 If we are unable to manage the level of NPAs in our Loan Assets, our financial position and results of operations may suffer.**

Our Gross NPAs as a percentage of Total Loan Assets were 0.44 % and 0.10 % as of March 31, 2013 and March 31, 2012 respectively, while our Net NPAs as a percentage of Net Loan Assets were 0.25 % and 0.05 % as of March 31, 2013 and March 31, 2012, respectively. We cannot be sure that we will be able to improve our collections and recoveries in relation to our NPAs or otherwise adequately control our level of NPAs in future. Moreover, as our loan portfolio matures, we may experience greater defaults in principal and/or interest repayments. Thus, if we are not able to control or reduce our level of NPAs, the overall quality of our loan portfolio may deteriorate and our results of operations may be adversely affected.

Furthermore, our current provisions may not be adequate when compared to the loan portfolios of other financial institutions. Moreover, there also can be no assurance that there will be no further deterioration in our provisioning coverage as a percentage of Gross NPAs or otherwise, or that the percentage of NPAs that we will be able to recover will be similar to our past experience of recoveries of NPAs. In the event of any further deterioration in our NPA portfolio, there could be an even greater, adverse impact on our results of operations.

**9.12 A decline in our capital adequacy ratio could restrict our future business growth.**

As per RBI notification dated February 17, 2011, all non deposit taking NBFCs have to maintain a minimum capital adequacy ratio, consisting of Tier I and Tier II capital, which shall not be less than 15.00% of its aggregate risk weighted assets on balance sheet and risk adjusted value of off-balance sheet items w.e.f. March 31, 2013. Our capital adequacy ratio computed on the basis of applicable RBI requirements was 18.34 % as of March 31, 2013, with Tier I capital comprising 10.11 %. If we continue to grow our loan portfolio and asset base, we will be required to raise additional Tier I and Tier II capital in order to continue to meet applicable capital adequacy ratios with respect to our business. There can be no assurance that we will be able to raise adequate additional capital in the future on terms favorable to us or at all and this may adversely affect the growth of our business.

**9.13 We face asset-liability mismatches which could affect our liquidity and consequently may adversely affect our operations and profitability.**

We face potential liquidity risks due to varying periods over which our assets and liabilities mature. As is typical for NBFCs, a portion of our funding requirements is met through short-term funding sources such as bank loans, working capital demand loans, cash credit, short term loans and commercial papers. However, each of our products differs in terms of the average tenor, average yield, average interest rates and average size of loan. The average tenor of our products may not match with the average tenor of our liabilities. Consequently, our inability to obtain additional credit facilities or renew our existing credit facilities, in a timely and cost-effective manner or at all, may lead to mismatches between our assets and liabilities, which in turn may adversely affect our operations and financial performance. Further, mismatches between our assets and liabilities are compounded in case of pre-payments of the financing facilities we grant to our customers.

**9.14 System failures or inadequacy and security breaches in computer systems may adversely affect our business.**

Our business is increasingly dependent on our ability to process, on a daily basis, a large number of transactions. Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control including a disruption of electrical or communications services. Our ability to operate and remain competitive will depend in part on our ability to maintain and upgrade our information technology systems on a timely and cost-effective basis. The information available to and received by our management through our existing systems may not be timely and sufficient to manage risks or to plan for and respond to changes in market conditions and other developments in our operations. We may experience difficulties in upgrading, developing and expanding our systems quickly enough to accommodate our growing customer base and range of products.

Our operations also rely on the secure processing, storage and transmission of confidential and other information in our computer systems and networks. Our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security. Any failure to effectively maintain or improve or upgrade our management information systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations. Moreover, if any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation. In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the localities in which we are located.

**9.15 We may not be able to maintain our current levels of profitability due to increased costs or reduced spreads.**

Our business strategy involves a relatively high level of ongoing interaction with our customers. We believe that this involvement is an important part of developing our relationship with our customers, identifying new cross-selling opportunities and monitoring our performance. However, this level of involvement also entails higher levels of costs and also requires a relatively higher gross spread, or margin, on the finance products we offer in order to maintain profitability. There can be no assurance that we will be able to maintain our current levels of profitability if the gross spreads on our finance products were to reduce substantially, which could adversely affect our results of operations.

**9.16 We are subject to supervision and regulation by the RBI as a deposit-taking NBFC, and changes in RBI's regulations governing us could adversely affect our business.**

We are subject to the RBI's guidelines on financial regulation of NBFCs, including capital adequacy, exposure and other prudential norms. The RBI also regulates the credit flow by banks to NBFCs and provides guidelines to commercial banks with respect to their investment and credit exposure norms for lending to NBFCs. The RBI's regulations of NBFCs could change in the future which may require us to restructure our activities, incur additional costs or could otherwise adversely affect our business and our financial performance.

**9.17 Civil unrest, terrorist attacks and war would affect our business.**

Terrorist attacks and other acts of violence, war or conflicts, particularly those involving India, as well as the United States of America, the United Kingdom, Singapore and the European Union, may adversely affect Indian and global financial markets. Such acts may negatively impact business sentiment, which could adversely affect our business and profitability. India has from time to time experienced and continues to experience, social and civil unrest, terrorist attacks and hostilities with neighboring countries. Also, some of India's neighboring countries have experienced or are currently experiencing internal unrest. This, in turn, could have a material adverse effect on the Indian economy and in turn may adversely affect our operations and profitability and the market for the Subordinate Bonds.

**9.18 Our business may be adversely impacted by natural calamities or unfavourable climatic changes.**

*India, Bangladesh, Pakistan, Indonesia, Japan and other Asian countries have experienced natural calamities such as earthquakes, floods, droughts and a tsunami in recent years. Some of these countries have also experienced pandemics, including the outbreak of avian flu. These economies could be affected by the extent and severity of such natural disasters and pandemics which could, in turn affect the financial services sector of which our Company is a part. Prolonged spells of abnormal rainfall, draught and other natural calamities could have an adverse impact on the economy, which could in turn adversely affect our business and the price of our Subordinate Bonds.*

**9.19 Any downgrading of India's sovereign rating by an international rating agency (ies) may affect our business and our liquidity to a great extent.**

Any adverse revision to India's credit rating for domestic and international debt by international rating agencies may adversely impact our ability to raise additional finances at favourable interest rates and other commercial terms. This could have an adverse effect on our growth, financial performance and our operations.
