14	TOTAL NET CASH OUTFLOWS			1,204.38
15	LIQUIDITY COVERAGE RATIO (%)			151.84%

**The average weighted and unweighted amounts are calculated taking simple averages of daily observations*

Qualitative Disclosure on LCR

The Liquidity Coverage Ratio (LCR) is a global minimum standard to measure the Company's liquidity position. The Reserve Bank of India introduced the liquidity coverage ratio (LCR) requirement for all deposit-taking NBFCs and non-deposit taking NBFCs with an asset size of Rs. 5,000 crore and above. LCR seeks to ensure that the Company has an adequate stock of unencumbered High-Quality Liquid Assets (HQLA) that can be converted into cash easily and immediately to meet its liquidity needs under a 30-day calendar liquidity stress scenario. LCR is calculated by dividing the stock of HQLA's by its total net cash outflow over a 30 day calendar period.

The Company has adopted the liquidity risk framework as required under RBI regulation. It ensures a sound and robust liquidity risk management system by maintaining sufficient liquidity through inclusion of a cushion of unencumbered, high quality liquid asset to withstand a range of stress events, including those involving the loss or impairment of both unsecured and secured funding sources. The Board of Directors have delegated responsibility of balance sheet Liquidity Risk Management to the Asset Liability Committee.

The LCR is calculated by dividing a Company's stock of HQLA by its total net cash outflows over a 30 -day stress period. The guidelines for LCR were effective from December 1, 2020 with the minimum LCR to be 50% which would rise in equal annual steps to reach 100%, on December 1, 2024. The present minimum LCR requirement is 85% effective from 1st December 2023. In order to determine High quality Liquid Assets, Company considers Cash and Bank Balances, Investment in Government Securities without any haircut. In order to determine net cash outflows, Company considers total expected cash outflow minus total expected cash inflows for the subsequent 30 calendar days. As per regulations, stressed cash flows is computed by assigning a predefined stress percentage to the overall cash inflows and cash outflows. Net cash outflow over next 30 days is computed as stressed outflows less minimum of stressed inflows, 75% of stressed outflow. Accordingly LCR would be computed by dividing Company's stock of HQLA by its total net cash outflow.

Cash outflow under secured wholesale funding includes contractual obligations under Term loans, NCDs, Interest payable within 30 days. Outflow under other contractual funding obligations primarily includes outflow on account of Book overdraft and sundry payables. In order to determine Inflows from fully performing exposures, Company considers the collection from performing advances in next 30 days. Other Cash inflows includes investments in mutual funds. The Average LCR for the quarter ended 31st December, 2023 was 151.84% as against 138.57% for the quarter ended 30th September, 2023 which is well above present prescribed minimum requirement of 85%. The average HQLA for the quarter ended 31st December, 2023 was Rs.1829 crore as against Rs. 1388 crore for the quarter ended 30th September, 2023. During the same period the composition of Government securities in the HQLA was 85.34% for the quarter ended 31st December, 2023 as against 82.47% for the quarter ended 30th September, 2023.
