Public disclosure on risk as on September 30, 2026

1) Funding Concentration based on significant counterparties

Sr. No	No of Significant Counterparties	Amt (in Crs)	% of Total Liabilities
1	17	64,691	59.56%

Note: The above is arrived excluding securitization exposure to Banks

2) Top Ten Borrowings as a % of Total Borrowings

Sr. No.	Particulars	Amt (in Crs)	% of Total Borrowing
1	Top 10	55,156	52.81%

3) Funding Concentration based on Significant Instrument /Products

Sr. No.	No of Instruments	Amt (in Crs)	% of Total Liabilities
1	Non-convertible Debentures	29,733	27.37%
2	Term Loans from Banks & FIs (Including WCDL)	45,320	41.72%
3	Subordinate Debts & Perpetual Debts	6,814	6.27%
4	External Commercial Borrowings	12,603	11.60%
5	Commercial Paper	4,030	3.71%
6	Securitisation	5,942	5.47%

4) Stock Ratios

Sr. No.	Stock Ratios	Ratio
1	Commercial Paper as a % of Total Public Funds	3.86%
2	Commercial Paper as a % of Total Liabilities*	3.71%
3	Commercial Paper as a % of Total Assets	3.08%
4	Non Convertible Debentures (original maturity of less than 1 year) as a % of Total Public funds	N.A
5	Non Convertible Debentures with (original maturity less than 1 year) as a % of Total Liabilities	N.A
6	Non Convertible Debentures with (original maturity less than 1 year) as a % of Total Assets	N.A
7	Other Short Term Liabilities** as a % of Total Public Funds	39.61%
8	Other Short Term Liabilities as a % of Total Liabilities	38.09%
9	Other Short Term Liabilities as a % of Total Assets	31.64%

Institutional set-up for liquidity risk management:

The Company monitors its inflows and outflows in various buckets and ensures that there are no major mismatches in assets and liabilities in various buckets. The Asset Liability Management (ALM) report is evaluated in the Asset Liability Committee (ALCO) meeting on monthly basis. The Company ensures that there is adequate liquidity cushion available in the form of investments in Government -

Securities, Mutual Funds etc. and unavailed Bank lines. The Company issues various instruments like Non-Convertible Debentures, Commercial paper, other market instruments and also borrows through Term Loans, Line of Credits and External Commercial Borrowings, etc.

The Company has a diversified mix of investors which includes Banks, Mutual Funds, Insurance companies, Foreign Institutional Investors, Corporates, Provident Funds etc.

Footnote

** Total liabilities refer to Total Outside Liabilities i.e. Balance Sheet Total excluding Share Capital and Reserves*

***Other short term liabilities include all contractual obligation payable within a period of 1 year excluding short term loans*

Liquidity Coverage Ratio (LCR) Disclosure (Q2 FY 2026-27)

		Quarter Ended September 30, 2026		
(Rs.in Crore)		Total Unweighted Value (average)*	Weight	Total Weighted value (average)*
High Quality Liquid Assets

15	**LIQUIDITY COVERAGE RATIO (%)**			**164.22%**

**The average weighted and unweighted amounts are calculated taking simple averages of daily values.*

Qualitative Disclosure on LCR

The Liquidity Coverage Ratio (LCR) is a global minimum standard to measure the Company's liquidity position. The Reserve Bank of India introduced the liquidity coverage ratio (LCR) requirement for all deposit-taking NBFCs and non-deposit taking NBFCs with an asset size of Rs. 5,000 crore and above. LCR seeks to ensure that the Company has an adequate stock of unencumbered High-Quality Liquid Assets (HQLA) that can be converted into cash easily and immediately to meet its liquidity needs under a 30-day calendar liquidity stress scenario. LCR is calculated by dividing the stock of HQLA's by its total net cash outflow over a 30 day calendar period.

The Company has adopted the liquidity risk framework as required under RBI regulation. It ensures a sound and robust liquidity risk management system by maintaining sufficient liquidity through inclusion of a cushion of unencumbered, high quality liquid asset to withstand a range of stress events, including those involving the loss or impairment of both unsecured and secured funding sources. The Board of Directors have delegated responsibility of balance sheet Liquidity Risk Management to the Asset Liability Committee.

The LCR is calculated by dividing a Company's stock of HQLA by it's total net cash outflows over a 30-day stress period. The guidelines for LCR were effective from December 1, 2020 with the minimum LCR to be 50% which rose to 100% effective from December 1, 2024. In order to determine High quality Liquid Assets, Company considers Cash and Bank Balances, Investment in Government Securities and Treasury Bills without any haircut. In order to determine net cash outflows, Company considers total expected cash outflow minus total expected cash inflows for the subsequent 30 calendar days. As per regulations, stressed cash flows is computed by assigning a predefined stress percentage to the overall cash inflows and cash outflows. Net cash outflow over next 30 days is computed as stressed outflows less minimum of stressed inflows, 75% of stressed outflow. Accordingly, LCR would be computed by dividing Company's stock of HQLA by it's total net cash outflow.
